Education

Vellore Institute of Technology

Bachelor's in Computer Science (B.Tech)

Bhopal, Madhya Pradesh

2023 – 2027

St. Joseph International School

Class 12th (CBSE)

Jhalawar, Rajasthan

2020 – 2022

Technical Skills

Languages: C, C++, JavaScript, TypeScript, Python, SQL

Technologies: Docker, Node.js, PostgreSQL, MongoDB, REST APIs

Core Competencies: Data Structures, Algorithms, Web Development

Experience

Orbosis

Backend Developer

Sep 2025 – Nov 2025

- System Architecture:** Architected the complete backend infrastructure for the BuildVeritas platform, designing modular REST APIs, database schemas, and authentication workflows to support scalable service integration.
- Performance Optimization:** Engineered high-throughput Node.js/Express microservices and optimized MongoDB/PostgreSQL indexing strategies, reducing API latency by **40–60%** under load and ensuring production-grade reliability.
- Security & Compliance:** Implemented a hardened security layer featuring JWT-based authentication, RBAC, input validation, and rate limiting, significantly reducing unauthorized access risks.
- Cross-Functional Leadership:** Partnered with product and frontend teams to establish strict API contracts, reducing integration conflicts and sprint rework by **30%**.

CodeVPN

Software Engineer Intern

May 2025 – June 2025

- Frontend Engineering:** Spearheaded the development of new core features for the customer-facing Console WebApp using React.js and Material UI, improving UX consistency and reducing UI load times.
- API Integration:** Orchestrated the integration of third-party services and developed secure Node.js/Express backend endpoints to streamline critical data workflows.
- Agile Collaboration:** Contributed to rapid delivery cycles within an Agile environment, participating in code reviews and cross-functional debugging to accelerate feature deployment.

Projects

PromoGenieAI React.js, Node.js, Gemini API, MongoDB

April 2025

- AI-Driven Application:** Developed a personalized ad script generator utilizing the Gemini API to process dynamic user inputs (brand, tone, audience) into high-quality video scripts.
- Performance Architecture:** Designed a layered backend architecture with local and server-side caching, eliminating redundant API calls and improving dashboard response times by **50%**.
- Scalability & Security:** Built a maintainable codebase featuring route separation and middleware-driven security (Rate Limiting, JWT), ensuring scalability for future feature expansion.

ResumeZen React.js, Node.js, OpenRouter AI, OCR Space

Feb 2025

- Automated Analysis Pipeline:** Engineered an ATS-optimization platform integrating OpenRouter AI and OCR Space, enabling automated PDF text extraction and intelligent resume feedback.
- Full-Stack Implementation:** Delivered a responsive dashboard for tracking resume history and improvements, supported by a secure backend managing JWT authentication and subscription-based user plans.

Awards and Achievements

- Global Rankings:** Secured **Global Rank 890** in Codeforces Round **1004 (Div. 2)** and **Global Rank 1200** in Codeforces Round **1054 (Div. 3)**.
- Competitive Programming:** Achieved **Top 0.5%** performance globally in coding contests on LeetCode and Codeforces, demonstrating advanced proficiency in Data Structures and Algorithms.
- Problem Solving:** Solved **1000+** DSA problems across various competitive platforms, maintaining top rankings in college-level hackathons and contests.
